

A LEGACY OF INNOVATION

Founded in India in 1989 by Ashwin M. Parekh, the Carysil Group has come a long way since producing its first kitchen sink. Three decades later, his son, CMD Chirag A. Parekh, has led the company to become Asia's No. 1 and the world's fourth-largest producer of quartz kitchen sinks.

Our innovative, design-led approach to manufacturing sets us apart in the marketplace. The revolutionary Carysil quartz composite kitchen sink is what we are best known for, thanks to its high-design aesthetic and toughened finish.

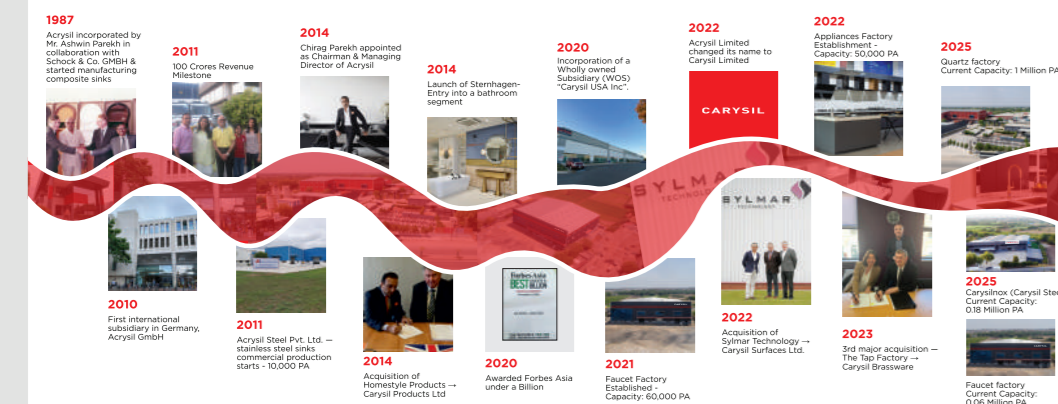

Our expertise in German technology has enabled us to diversify into a wide range of kitchen products. We now successfully manufacture and market stainless steel sinks, faucets, food waste disposer units, and kitchen appliances such as hobs and cooktops, ovens, wine chillers, and dishwashers.

A highly popular brand across the US, UK, Germany, France, Canada, China, the Far East, and the Gulf countries, Carysil is a trusted choice for kitchen solutions in over 50 countries worldwide.

LEADING THE WAY

Remaining a market leader is far more demanding than becoming one. At Carysil, we uphold this position through an uncompromising commitment to excellence.

The careful selection of the finest raw materials, combined with state-of-the-art technology, ensures that every product meets the highest international standards and rigorous safety regulations.

Our advanced engineering and stringent quality processes deliver products that are exceptionally durable, food-safe, easy to maintain, and built to retain their finish over time.

The Carysil Group was founded in India in 1987 by Ashwin M. Parekh. Our journey began with the production of our first kitchen sink, developed in technical collaboration with Schock & Co., Germany—an established global leader.

Under the leadership of CMD Chirag A. Parekh, Carysil has evolved into one of the world's leading producers of quartz kitchen sinks, under the Carysil brand.

In addition to its leadership in sink manufacturing, Carysil's global experience and expertise have enabled a natural expansion into a wider range of kitchen solutions. Today, we manufacture stainless steel sinks, faucets, food waste disposer units, and kitchen appliances such as hobs, cooktops, ovens, wine chillers, and dishwashers.

WHAT IS SUSTAINABILITY?

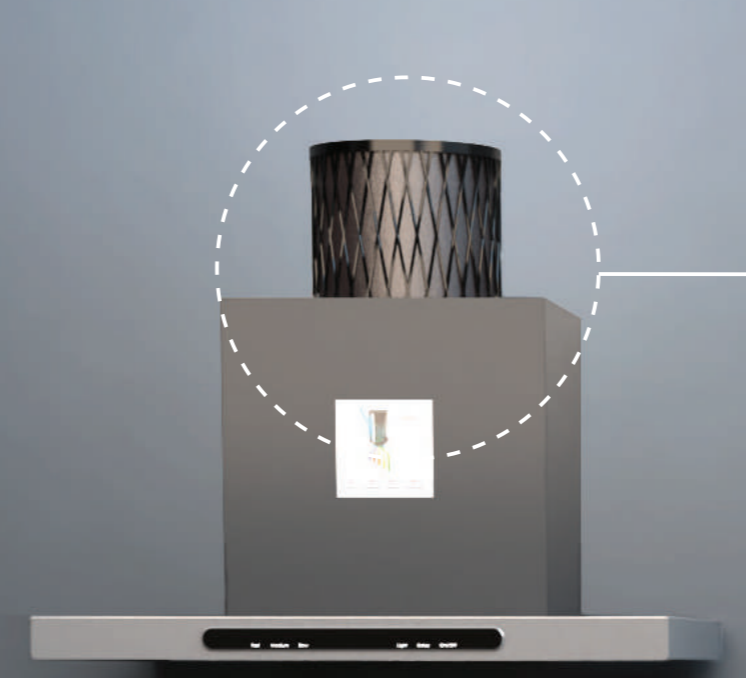

In the broadest sense, sustainability refers to the ability to maintain or support a process continuously over time. In business and policy contexts, sustainability seeks to prevent the depletion of natural or physical resources, so that they will remain available for the long term. Sustainable development requires an integrated approach that takes into consideration environmental concerns along with economic development.

BENEFITS OF SUSTAINABILITY

Sustainability provides countless benefits to businesses and individuals. As individuals, there are always changes we can make to live more sustainably while saving money. Things like repurposing, recycling and reusing items at home can provide easy, sensible and environmentally responsible options.

POWERED BY PLASMA, PERFECTED BY INNOVATION

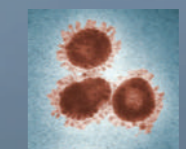

- 12v jack plug connection.
 - 2x control light.
 - DIN connection external communication.
- PLASMA ELEMENT**
Plasma is created with high voltage, this plasma neutralizes odours and micro-organisms.
 - ESD - FILTER**
The ESD Filter uses high voltage (1-4KV) to break down solid contaminants (grease, fine dust, pollen, bacteria).
 - CERAMIC FOAM**
Neutralizes the last substances in the air and, together with the conical inner chalice, provides a sound-damping effect. The black appearance provides a neat finish.
 - FILTER SENSORS**
Neutralizes the last substances in the air and, together with the conical inner chalice, provides a sound-damping effect. The black appearance provides a neat finish.

ODOURS

With the help of our plasma technology, all types of odours and volatile organic compounds (VOCs) are broken down.

MICRO ORGANISMS

Bacteria, fungi, pathogens and other microorganisms are taken from the air and neutralized.

ALLERGENS

An E-Filter helps with respiratory complaints such as asthma and bronchitis, and against pollen, dust mites and pet allergies.

PARTICULATE MATTER

Suspended particulate matter such as aerosols, smoke and dust, are filtered and neutralized.

TRIZONE 3-IN -1 HYBRID HOB

Trizone 3-in-1 Hybrid Hob is built for a kitchen that refuses to be limited. Three technologies. One seamless surface.

A gas burner for traditional cooking, an induction zone for precision and speed, and an infrared ceramic burner for consistent, high-performance heating all integrated into a single, refined unit.

In a world where gas availability can be unpredictable, this hob gives you the freedom to choose your flame, your heat, your method without compromise.

No switching appliances. No interruptions. Just fluid cooking, your way.

One hob. Three possibilities. Complete control.

FAUCET

OUR FAUCET RANGE

Our range of faucet options let you combine comfort and convenience with great design flexibility. Our faucets come in a variety of heights, spout design and shape from a compact low spout for small spaces to a high spout perfect for filling pots, as well as in a choice of U, C or L-shape to perfectly suit your style.

Need even more flexibility? Our faucets that swivel or feature pull-down spray heads offer extra reach, power and performance for busy kitchens.

RO SYSTEM PURE WATER

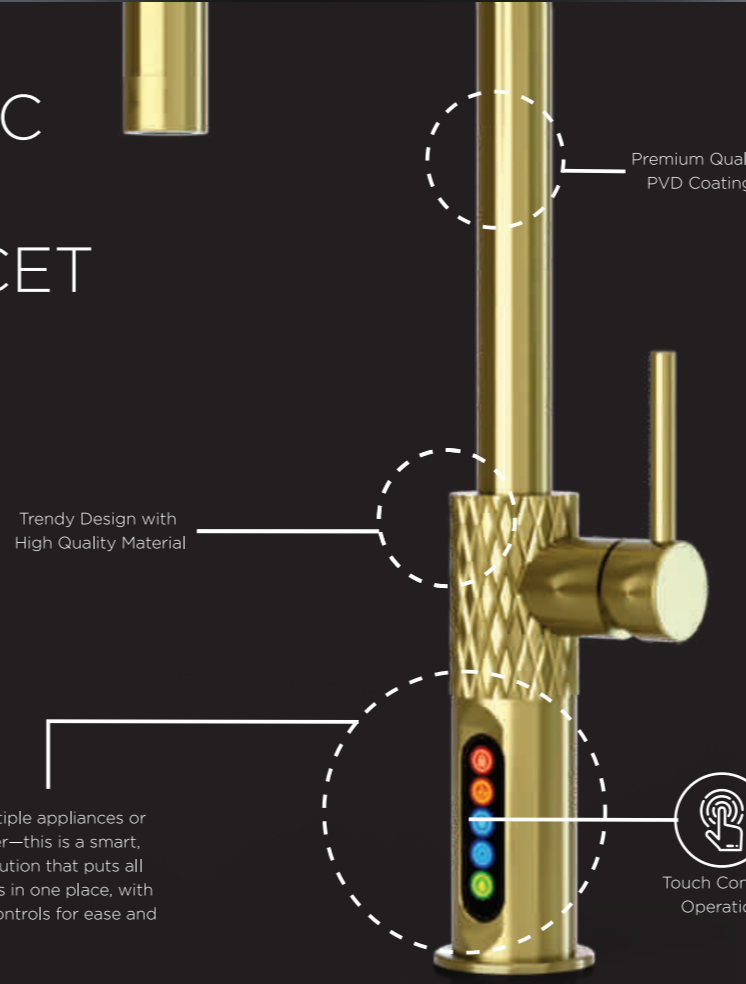

DUAL WATER OUTLET: LIFE WATER & DIRECT DRINKING.

WHY CHOOSE THE CARYSIL RO SYSTEM

- Dual Water Outlet: Life Water & Direct Drinking
- 4-Stage RO Filtration for Safe & Clean Water
- Tankless, Space-Saving Modern Design
- 800 Gallons/clay Capacity
- Automatic Flushing Extends Filter Life
- Smart 3:1 Pure to Waste Water Ratio
- Touch Control Operation
- 220V/50Hz Rated Voltage
- 96W Power Consumption
- Integrated design of the electrical and water circuits reduces leakage
- Easy filter replacement
- RO system
- Dual water outlet for direct drinking and life water
- Tankless space-saving design
- 4-Filter Filtration

MAGIC 6-IN-1 FAUCET

- Trendy Design with High Quality Material
- Premium Quality PVD Coating
- Touch Control Operation
- No need for multiple appliances or under-sink clutter—this is a smart, space-saving solution that puts all your water needs in one place, with modern touch controls for ease and safety

This tankless, compact water filter fits easily under your sink and offers dual outlets for both kitchen use and drinking water. It features easy, tool-free filter replacement, an integrated circuit design to reduce leakage risk, and intelligent filter and flushing indicators. Enjoy long-lasting performance with filters that last up to 12 months for PPC and 36 months for RO.

SMART CONTROL FAUCET

A smart control faucet offers advanced, user-friendly water management through a touch interface, allowing easy water flow start/stop and volume control without traditional levers. It often includes features like hands-free operation using wrists or elbows for water or soap dispenser on-off water flows exclusively during use and allows for completely touch-free operation. This not only saves resources, it is also highly hygienic.

SOMMELIER

CX SS 60-4

WALTZ WORKSTATION 750

Carysil Stainless Steel Kitchen Suite is where strength meets seamless design. A fully integrated, single-unit kitchen crafted entirely in stainless steel for a bold, uncompromising presence.

From the structure and countertop to the sink, hob, and even a built-in wine chiller, every element is engineered as one unified form. No breaks, no visual noise just pure, industrial elegance.

Paired with matching steel appliances like microwaves and dishwashers, the space transforms into a heavy-duty, ultra-premium kitchen that feels as powerful as it looks.

One material. One structure. One statement of absolute precision.

SOMMELIER

The Carysil Sommelier is a refined, built-in bottle cooling system designed to elevate the art of serving. Seamlessly integrated into your countertop, it maintains your beverage at the perfect serving temperature ensuring every pour is as crisp as the first. With its minimalist crown design, ambient lighting, and smart controls, Sommelier transforms everyday moments into sophisticated hosting experiences.

KÖRN

A sink that rethinks geometry to unlock pure performance.

By shifting the faucet deck to a single corner, the design opens up a larger, uninterrupted bowl, giving you effortless space to handle even the most oversized cookware. The diagonal spout reach ensures precise coverage across the basin, blending ergonomics with elegance.

Behind the scenes, this smart layout frees up valuable under-cabinet space while keeping the deck cleaner, drier, and easier to maintain.

More space. Smarter flow. A sink designed around how you truly work.

With the faucet positioned at the corner, the pull-out design extends effortlessly across the entire sink, reaching every edge with precision.

It ensures controlled water flow with minimal splashes, keeping your space cleaner and more refined.

Easy reach. Easy cleaning. Effortless maintenance.

CARYSIL BLUE

REDEFINING THE ART OF BATHROOM SUITE

Curated suites for every expression. Individuality Meets Intelligent Design. Crafted for Connoisseurs. Inspired by You. Spaces That Speak Your Language. Function Meets Pure Emotion. Quality Meets Conscious Design. Design That Moves Beyond Convention.

A sink inspired by the elegance of timeless arches and domes, translated into a sculpted quartz form.

ARCH

Its integrated waste system is built seamlessly within the sink, like a single architectural masterpiece free of visual breaks.

BUILT FOR POWER, DESIGNED FOR EASE

Magna 90 is a new-age chimney designed for modern kitchens, combining filterless technology, BLDC silent motor, and powerful airflow for effortless, high-performance ventilation.

With touch & motion controls, it adapts to how you cook today smart, hands-free, and intuitive.

In a time where convenience and clean air matter most, this chimney delivers efficient, low-maintenance, and future-ready kitchen living.
