AROUND THE WORLD

- Global Offices
- Global Presence

You can discover our entire kitchen range in 6 continents and in over 50+ countries through our established and ever-expanding worldwide network of retail partners including the North and South America, United Kingdom, Canada, China, Germany, France, the Far East and the Gulf states; and through our subsidiaries in the UK, Germany and the United States of America.

OUR FACTORY

WHERE PRECISION MEETS CRAFT

At Carysil, every faucet begins its journey in our state-of-the-art manufacturing facility. With advanced technology and stringent quality controls, our factory transforms raw materials into precision-engineered, high-performance faucets. Skilled craftsmanship and automated processes come together to ensure flawless functionality and lasting durability, meeting international standards. It's not just about making faucets; it's about

TECHNOLOGY

QUALITY

From the first design sketch to the final product after-sales services: Our customer can rely on our manufacturing sense of perfectionism.

SEDAL CARTRIDGE

Engineered for long-lasting durability, these faucet cartridges are tested up to 500,000 cycles, ensuring years of reliable performance. The diamond-hard ceramic surfaces create a tight seal to prevent leaks and drips. Designed for smooth, low-torque operation, they provide effortless control even under high pressure. Built to withstand high temperatures, they maintain performance without warping or failure.

THE FAUCET'S HEART

A leak-free ceramic valve designed for long-lasting durability. Tested to prevent leaks for over 50 million cycles.

CERAMIC VALVE CORE

Our high-performance ceramic valve has been proven through an extensive, rigorous 5,00,000 cycle leak-free test. This advanced technology excels in both saving water and reducing household energy consumption.

FAUCETS

WATER SAVING WITH TWO STEP SYSTEM

The handle for turning up the water has a precise, noticeable tactile feedback at Approx 20% of the opening. The first step operates the water-saving function, and the full range is for full flow.

90° FORWARD ROTATION COLD WATER START HANDLE CONTROL

Our advanced cold-water start switch technology ensures that the initial handle movement always releases cold water. The handle can be rotated a full 90 degrees forward, so hot water is only released when intentionally selected and needed.

SUSTAINABILITY

Designed with the environment in mind, our sustainably crafted faucets feature advanced water-saving technology that reduces daily waste while maintaining a powerful, reliable flow. Built to last with a durable, leak-free construction, they offer an eco-conscious solution that protects both your home and the planet.

TECHNOLOGY

We constantly drive innovation to enrich your everyday water experience, delivering smart solution on the path of the digitization of water.

KITCHEN FEATURES

Accommodating your every wish and desire, CARYSIL watersystems and kitchen faucets include user-centric features and ingenious details that make all the difference. More choice, more comfort and more flexibility: which is why our products are such a pleasure to use.

NEW

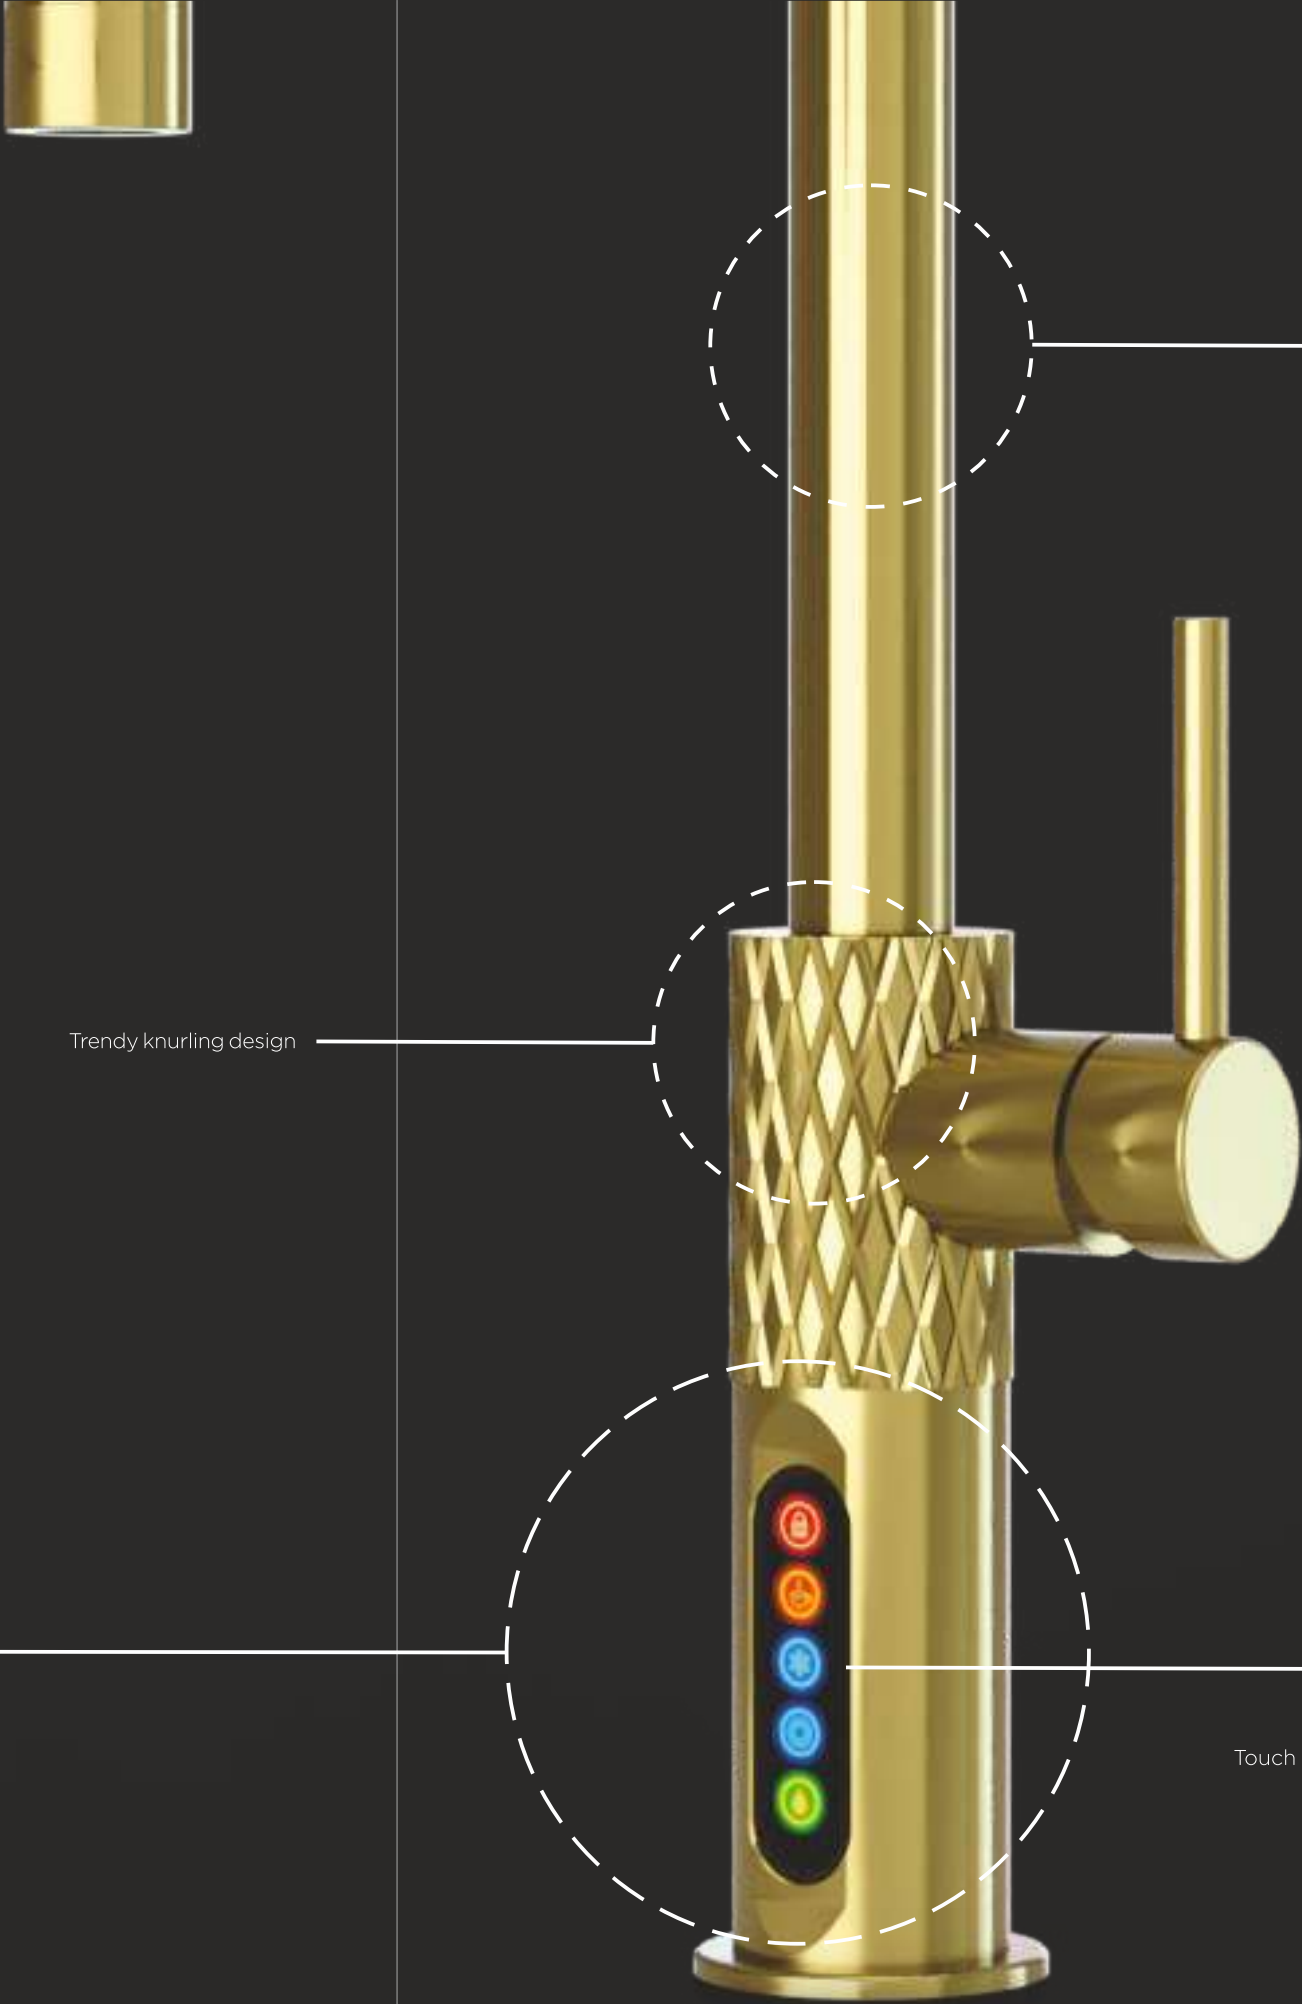

MAGIC FAUCET

No need for multiple appliances or under-sink clutter—this is a smart, space-saving solution that puts all your water needs in one place, with modern touch controls for ease and safety

Trendy knurling design

Premium Quality PVD Coating

Touch Control Operation

NEW

Suitable For All* range
of CARYSIL faucets

RO FAUCET

This tankless, compact water filter fits easily under your sink and offers dual outlets for both kitchen use and drinking water. It features easy, tool-free filter replacement, an integrated circuit design to reduce leakage risk, and intelligent filter and flushing indicators. Enjoy long-lasting performance with filters that last up to 12 months for PPC and 36 months for RO.

Touch Control Operation

NEW

SMART CONTROL FAUCET

A smart control faucet offers advanced, user-friendly water management through a touch interface, allowing easy water flow start/stop and volume control without traditional levers. It includes features like hands-free operation using wrists or elbows for water or soap dispenser on-off. Water flows exclusively during use and allows for completely touch-free operation. This not only saves resources, it is also highly hygienic.

Touch Control Operation

WATER FLOW

Optimize your workflow with a Multi-function spray. Seamlessly transition between aerated stream and powerful spray modes to simplify cleaning.

TYPES OF FAUCET

> Our range of faucets lets you combine everyday comfort with ultimate design flexibility. They are available in a variety of heights, spout designs, and shapes—from compact low spouts for tight spaces to high-clearance spouts ideal for filling large pots. Choose from sleek U-, C-, or L-shaped profiles to perfectly complement your style.

Require even more versatility? Models featuring swivel capabilities or pull-down spray heads offer the extra reach, power, and performance necessary for busy kitchens.
